

# CORGI INCIDENT INVESTIGATION SERVICES

Call on the extensive knowledge and experience of the CORGI Technical Services gas experts

Peace of mind that your incident will be thoroughly and professionally investigated by the experts in safety..... with over 40 years of experience.

**Full incident investigations for gas suppliers, HSE, Coroners, Police Forces, landlords and other relevant parties.**

The team of experienced gas experts from CORGI Technical Services carry out independent incident investigations across the UK and worldwide. These are carried out on behalf of gas suppliers, the HSE, Coroners and Police Forces but can be carried out for landlords and other organisations as required. In particular, some carbon monoxide (CO) incidents are reportable to the Health & Safety Executive (HSE) under the Reporting of Injuries, Diseases & Dangerous Occurrences Regulations 2013 (RIDDOR) Regulation 11 (1) and a specific independent incident investigation must be carried out.

## **From CO alarm activation to a serious incident investigation**

Whether the incident is the activation of a CO alarm or a serious incident, landlords and other organisations have a duty to investigate, whether or not the incident has resulted in an injury. The CORGI Technical Services team can carry out an investigation and make the necessary recommendations for further action if required.

## **Qualified and experienced CORGI investigators**

- ◆ All CORGI investigators have achieved a City & Guilds qualification in incident investigation
- ◆ All CORGI investigators are regularly assessed through CPD and training in all areas of gas work including natural gas and liquefied petroleum gas for both domestic and non-domestic premises

Call a CORGI expert on **01256 548040** to discuss your requirements or email [enquiries@corgitechnical.com](mailto:enquiries@corgitechnical.com)

# CORGI GAS SAFETY AUDITS

## Rapid nationwide response service

- ♦ The CORGI Technical Services incident investigator service is managed from one point of contact
- ♦ The service is available during the Christmas holiday period and other public holidays
- ♦ The service is available during a five-day working week and wherever practicable within one working day of notification of the suspected incident

Investigations are undertaken following the guidance laid down by the Institution of Gas Engineers and Managers (IGEM).

## The purpose of the investigation could include:

- ♦ To confirm carbon monoxide (CO) was involved
- ♦ To confirm that CO is being produced and identify the source
- ♦ To confirm that sufficient concentration can be produced from that source to result in the level of carboxyhaemoglobin (COHb) found in the casualty
- ♦ To confirm that concentration of CO can be achieved in the available time
- ♦ To identify the reason for the production of the CO
- ♦ To identify the reason for the spillage or leakage of combustion products
- ♦ To identify the reason for the build-up of the concentration
- ♦ To carry out CO alarm activation investigations

## CORGI Technical Services

Highly experienced CORGI gas experts helping you achieve the highest standards in gas safety

- ♦ Expert auditing services
